

WHAT IS CLAIMED IS:

1. A process for improving print quality of a document created utilizing Internet-type network applications, comprising the steps of:

accessing a web-site server having a selection of document layouts, from a local computer;

creating a customized document request utilizing a plug-in component installed on the local computer;

communicating the customized document request to the web-site server;

retrieving document layouts from the web-site server according to the customized document request; and

sending a customized document fulfilling the customized document request from the web-site server to the local computer.

2. The process of claim 1, wherein the creating step includes the steps of selecting a document type and document content.

3. The process of claim 2, wherein the step of selecting document content includes selecting a graphics image.

4. The process of claim 2, wherein the step of selecting document content includes adding text to the document.

5. The process of claim 2, including the step of selecting a font to be applied to the text of the document.

6. The process of claim 2, including the step of selecting document resolution.

7. The process of claim 2, including the step of selecting image and text orientation.

8. The process of claim 1, including the step of printing the customized document.

9. The process of claim 8, including the step of determining whether a printer connected to the local computer is capable of printing the customized document, and if not, notifying the user of the printer's incapability.

10. The process of claim 1, including the step of electronically transferring the customized document to another personal computer.

11. The process of claim 1, including the step of downloading the plug-in from the Internet.

12. The process of claim 1, wherein the communicating step includes using a web browser of the local computer to interface with the server through the Internet.

13. A process for improving print quality of a document created utilizing Internet-type network applications, comprising the steps of:

accessing a web-site server having a pre-prepared selection of document layouts, from a local computer;

creating a customized document request utilizing a plug-in component installed within a web browser of the local computer, including selecting document type and document content;

using the web browser to interface with the server through the Internet and communicate the customized document request to the web-site server;

retrieving document layouts from the web-site server according to the customized document request; and

sending a customized document fulfilling the customized document request from the web-site server to the local computer.

14. The process of claim 13, wherein the creating step includes selecting at least one of a graphics image, document resolution, and image and text orientation.

15. The process of claim 13, wherein the creating step includes the step of adding text to the document.

16. The process of claim 13, wherein the creating step includes the step of applying a font to the text of the document.

17. The process of claim 13, including the step of determining whether a printer connected to the local computer is capable of printing the customized document, and if so, printing the customized document, and if not, notifying the user of the printer's incapability.

18. The process of claim 13, including the step of electronically transferring the customized document to another personal computer.

19. The process of claim 13, including the step of downloading the plug-in from the Internet.

20. A process for improving print quality of a document created utilizing Internet-type network applications, comprising the steps of:

accessing a web-site server having a pre-prepared selection of document layouts, from a local computer;

creating a customized document request utilizing a plug-in component installed within a web browser of the local computer, wherein the creating step includes the steps of selecting document type and document content, selecting at least one of a graphics image, document resolution, and image and text orientation, allowing text to be added to the document, and applying a font to the text of the document;

004240 9029560

using the web browser to interface with the server through the Internet and communicate the customized document request to the web-site server;

retrieving document layouts from the web-site server according to the customized document request; and

sending a customized document fulfilling the customized document request from the web-site server to the local computer.

21. The process of claim 20, including the step of determining whether a printer connected to the local computer is capable of printing the customized document, and if so, printing the customized document, and if not, notifying the user of the printer's incapability.

22. The process of claim 20, including the step of electronically transferring the customized document to another personal computer.

23. The process of claim 20, including the step of downloading the plug-in from the Internet.
